

**CLAIMS**

1. An inside structure of a male underpants having a waist band 110, a plurality of cord connected to the waist band 110, a plurality of member 170a, 170b, 170c, 170d for adjusting a cord length, and a plurality of member 160a, 160b, 160c, 160d for having each cord separably connected to the waist band 110, the inside structure comprising:

a penis cord 120 for lifting a lower muscle of a penis;

penis supporting cords 130a, 130b having each one end connected to either side of the penis cord 120 and each other end connected to either side of the waist band 110; and

a penis exercising cords 140a, 140b having each one end connected to predetermined positions 140c, 140d between the either side and a front side of the waist band 110 and each other end connected to the either side of the penis cord 120.

2. The inside structure of the male underpants according to claim 1, wherein the penis supporting cords 130a, 130b are adapted to be positioned along a crease between a leg and an abdomen, the penis supporting cords 130a, 130b being made of an elastic material to make the same movement as the penis exercising cords 140a, 140b.

3. The inside structure of the male underpants according to claim 1, wherein the penis exercising cords 140a, 140b are connected to cause the penis to make a shaking motion and a centrifugal motion when upper parts of the penis exercising cords 140a, 140b are repeatedly pulled.

4. The inside structure of the male underpants according to claim 1, wherein the penis cord 120 is beaded to have a bead made of jade or silver built-in or is looped, the penis cord 120 including a healthful and hygienic tuft 150a, 150b, the penis cord 120 being made of medicinal material or aromatic material.
